

Rigging instructions for CL289 cleat with PT429 strap.

To fit wingfoil bars
24-27mm (1 inch) diameter.

Velcro fastenings are
designed for
black > black & blue > blue

1.
Fold black end like this

Push end through slots in cleat

Slide cleat to here.

Touch black Velcro together.

Adjust Velcro to bar size:-

For a smaller bar.

For a larger bar.

(You may have to adjust several
times to get just the right fit of
the cleat against the bar.)

Wrap very tightly around bar

Twist webbing through 180 degrees
to hold cleat against bar .

Wrap webbing loop over cleat.
(This is designed to be a tight fit.)

Pull blue "loop" Velcro hard and wrap around bar.
Cleat should then sit tightly against the tube.

Threading the rope:-
