

Cleats for Sports Netting

- Leading Sports Net manufacturers are using Clamcleat® rope cleats for tensioning nets and headlines.
- In ski resorts, barrier nets are used to keep spectators away from the piste when watching ski racers. Both the CL223 and CL234 are used to tension snow netting.
- The CL211 Mk2 is used as a net tensioner on this beach volleyball set.
- The CL223 is ideal for tensioning both volley ball and badminton nets. Use the CL260 for tensioning lightweight, portable nets.
- Where a wall rack replaces posts - the picture shows CL213 Fine Line cleats, but for heavier duty nets, the CL254 alloy Midi is used, with larger ropes. The CL204 and CL217 Mk1 are also used on wall racks.

These four cleats are used to tension nets on wall racks.

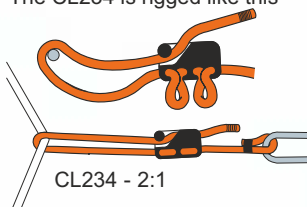

Cleats used to tension snow netting

CL234

The CL234 is rigged like this

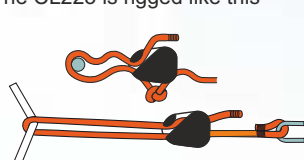

CL234 - 2:1

CL223

The CL223 is rigged like this

CL223 - 2:1

CL211Mk2
This cleat is used to tension the net in this beach volleyball set.

Cleat to tension volleyball nets, badminton nets and lightweight, portable nets (CL260).

CL223

CL260
